the past few years have been a period of unprecedented political upheaval for the maghreb a protest which began in a provincial city in one of north africa's quieter corners quickly engulfed the entire region presidents of decades standing were swept from office on waves of public discontent while their counterparts elsewhere nervously tried to calm the mob in several places these protests are still being played out in the law courts of egypt on the battlefields of libya and in the leaking tubs carrying migrants to europe and even where the winds of change have died down the political and social landscape is altered from before herein lies a defining paradox of the arab spring its ubiquity and singularity nearly all of the region's countries have been affected but despite making similar demands in largely the same ways over much the same period their respective protest movements have achieved different results drawing on steven levitsky and lucan way's celebrated model for examining political transitions this book explains these discrepancies why tunisia algeria morocco and mauritania have reached different outcomes it does so by contextualising each country's experiences by examining and comparing their political development over the past decade
