increasing urbanization and changing climate are two critical stressors that are adversely affecting the biophysical environment of urban areas in the hindu kush himalaya the book discusses various choices and options from demand management to supply enhancement understanding ecological footprints of towns to managing water at a bioregional scale in doing so it is vital to address issues of equity and empower local institutions in managing water the focus for the future must be on building urban resilience by strengthening the adaptive capacities of affected communities while also understanding the limits to adaptation in focus a book series that showcases the latest accomplishments in water research each book focuses on a specialist area with papers from top experts in the field it aims to be a vehicle for in depth understanding and inspire further conversations in the sector

india has witnessed a transformative shift in women s roles and impact across various sectors over the past decade from agriculture to aeronautics business to battlefields classrooms to corporate offices and playgrounds to parliament women have redefined gender equality narratives nationwide this book celebrates this indomitable spirit exploring women s struggles triumphs and significant contributions in shaping modern india it reflects the evolving influence of women in contemporary indian society and celebrates their achievements in diverse fields this book highlights how indian women have begun to tap into this vast potential driving a paradigm shift each chapter honours women who

have challenged societal norms driven economic growth and defied conventions pm modi s vision of women as nation builders is evident in the recent law reserving 33 of parliamentary seats for women and initiatives like lakhpati didi and drone didi empowering female entrepreneurs and revolutionising agriculture empowered women contribute significantly to economic growth break poverty cycles and enhance community decision making essential for realising india s full potential a real tribute to the untiring efforts of our empowered women

algorithms play a central role both in the theory and in the practice of computing the goal of the authors was to write a textbook that would not trivialize the subject but would still be readable by most students on their own the book contains over 120 exercises some of them are drills others make important points about the material covered in the text or introduce new algorithms not covered there the book also provides programming projects from the table of contents chapter 1 basic knowledge of mathematics relations recurrence relation and solution techniques function and growth of functions chapter 2 different sorting techniques and their analysis chapter 3 greedy approach dynamic programming branch and bound techniques backtracking and problems amortized analysis and order statics chapter 4 graph algorithms bfs dfs spanning tree flow maximization algorithms shortest path algorithms chapter 5 binary search tree red black tree binomial heap b tree and fibonacci heap chapter 6 approximation algorithms sorting networks matrix operations fast fourier transformation number theoretic algorithm computational geometry randomized algorithms string matching np hard np completeness cooks theorem

in most developing countries agriculture has grown from merely an art to a science but it does not yet maximize its business potential in these countries subsistence farming dominates and farmers face the increasing impact of climate change and natural disasters an integrated farming system ifs model yields minimum risk and maximum environmental benefit the latest cutting edge technologies applicable to each component of ifs and the science behind an agro

ecological approach are discussed at length in this book which takes a holistic approach towards sustainable agricultural production technologies that result in maximum profit for the farming community also it considers practices that care for natural resource bases and leave behind minimal environmental footprints to keep prepared for climate change and natural disasters appropriate contingency measures to tackle these unwanted situations are detailed the book offers comprehensive coverage of the most essential topics including modern technologies new concepts and innovations such as 3d farming integrated system of rice intensification isri hydroponics rooftop farming and water budgeting the use of it for supporting ifs and environmental aspects related to greenhouse gas ghg emission information on organic farming covering all its aspects present situation market related issues and future options in situ input generation procedures that are integral to recycling and their effective reuse region specific ifs models based on soil climate and farmers requirements for different agroclimatic situations ifs management aspects including water harvesting conservation increased productivity and drainage latest information on the socio economic factors impacts government orientations policy framework towards agriculture and environmental aspects and the future road map to make ifs a success this book will serve as a handy reference for academics researchers students progressive farmers and policymakers aiming to make agriculture more resilient sustainable and eco friendly

the covid 19 pandemic has laid bare the vulnerabilities of socio economic systems globally and exposed the risks that natural capital degradation imposes on human health economy and society this book studies the environmental challenges faced by developing economies in a post covid 19 world exploring diverse case studies from south asia and sub saharan africa the volume discusses the impact that economic development and recently covid 19 has had on the environment ecology and economy of these regions it analyses nature conservation policies aimed at minimizing ecological damage arising from economic development and discusses the policy objectives of sustainable development

it also highlights the significant role that environmental economics networks have played in capacity building framing of policies using ecological economics tools and developing a local leadership trained in addressing local sustainability issues an important contribution to the study of environmental economics of the global south the book will be of interest to students and researchers of economics environment development studies development economics environmental policies and south asia studies it will also be useful for policymakers and ngos working in this field

this book proposes regenerative sanitation as the next era of sanitation management and attempts to provide a foundation for the study of sanitation on the premise that sanitation is a complex and dynamic system that comprises of social ecological technological and resource systems the preconception is that sanitation will deliver maximal benefits to society only when there exists a cyclical integration of the three subsystems to enable appropriate linkages between technological design and the delivery platform so as to achieve optimal and sustained sani solutions it also calls for the rethinking of sanitation to change the narrative towards more progressive trajectories such as resource recovery and reuse rather than just amelioration it explores the contributions to food security livelihood support urban regeneration rural development and even local economies a new paradigm theory and ten principles for ensuring practical and effective sanitation solutions and management is presented in addition is a unique conceptual framework applicable to both developed and developing countries and to all stages processes and cycles of delivering sanitation solutions that could critically evaluate analyse and provide credible adequate and appropriate sanitation solutions all of which culminates in a strategic and practical application platform called sanitation 4 0 that advocates for total rejuvenation and comprehensive overhaul with eight key strategic considerations for the implementation regenerative sanitation a new paradigm for sanitation 4 0 is inter and trans disciplinary and encourages collaboration between engineers scientists technologists social scientists and others to provide effective and practical user centred solutions it includes

relevant case studies examples exercise and future research recommendations it is written as both a textbook for researchers and students as well as a practitioners guide for policymakers and professionals

study on the demand for the creation of separate political division of uttar khand region as uttarakhand state

art and architecture of uttarakhand is the first ever comprehensive study on the art and architectural legacy of the newly formed hill state of uttarakhand this mountainous state can proudly boast of being that part of the subcontinent wherfrom the indian civilisation developed and proliferated to the pan indian dimension in fact the kedarkhand the classical identity of this region formed an integral part of the aryavart or the bharat since the first settlement of the indo aryans in the gangetic plains the snow clad himalayan ranges of kedarkhand have been the source of perpetual attraction and inspiration to the multitude of humanity the world over this region has been the grand repository of diverse cultures since the khasha and kirati cultures intermingled here ages ago and as the wheels of time rolled by innumerable ethno cultural milieus developed flourished and vanished here the imprints of all those past identities are still buried under the substratum of the dominating brahminic culture obviously uttarakhand should be one of the archaeologically richest parts of the sub continent in the present study an attempt has been made for the first time to discover all those subterranean evidences material and non material to present a wholesome picture of the culture scenario of uttarakhand in all its vividness while the material evidences of the two most dominating religions in the history of this region buddhism and brahminism have been adequately analysed and discussed in the context of the standing temples the anterior khasha culture has also been brought to light and the religious and socio cultural facets of that exotic culture discussed in the context of the standing wooden temples the surviving material evidences of what may be defined as the khasha architecture in fact in the present work a wholesome and cognizable picture of the past cultures of this region has been presented through archaeology in uttarakhand the tradition of painting remained

confined only to what earlier used to be the garhwal kingdom miniature painting flourished in that kingdom under the influence of mughal and western pahari schools ironically without feudal patronage in such a situation could an art architecture of uttarakhand progression to perfect publishing independent school of painting flourish here is a problem that has been thoroughly discussed so far our knowledge about the tradition of painting in garhwal has remained subjective and biased it is for the first time that the problem whether garhwal school of painting has been subjected to the acid test to ascertain the reality nevertheless the garhwal atelier did inspire painting on the walls of guru ram rai durbar at dehradun in the akharas and havelis at kankhal and havelis at saharanpur it is again for the first time that the tradition of miniature painting and wall painting in uttarakhand has been studied objectively and in a comprehensive manner in the present work art and architecture of uttarakhand therefore has a legitimate claim to be the pioneering and trail blazing work in many respects
