the european union has highlighted the issue of environmentally sound use of products in the context of integrated product policy ipp accordingly consumers should have easy access to understandable relevant and credible environmental information information about product characteristics is available in different forms and sources but in many cases relevant environmental information is not available on the product itself the study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information user manuals of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental effects of the use of these products other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products the study raised many ideas about actions that could promote the status and eco development of instructions for use

the search for smarter ways to prevent or control pollution has generated heated debate on almost every conceivable topic related to setting goals improving institutional arrangements and choosing the most effective means for achieving those goals this last issue choosing the means or policy instruments to meet environmental goals can be a surprisingly complex task for decision makers given the need to balance other competing concerns the environmental policy toolbox contains many and varied instruments but lacks a clear set of instructions for their use this ota report fills that need the guide is organized into three major sections 1 the environmental policy toolbox a discussion of 12 major policy tools their frequency of

use and key strengths and weaknesses 2 the criteria for comparing tools our evaluation of how effective these instruments are in achieving the values and interests or criteria decision makers are likely to weigh 3 choosing tools a series of questions for matching a tool or tools to a specific problem choosing tools that satisfy several much less all of these criteria for a specific problem is the challenge unfortunately no perfect policy tool exists to meet everyone s expectations for every problem
